

Combination Meter

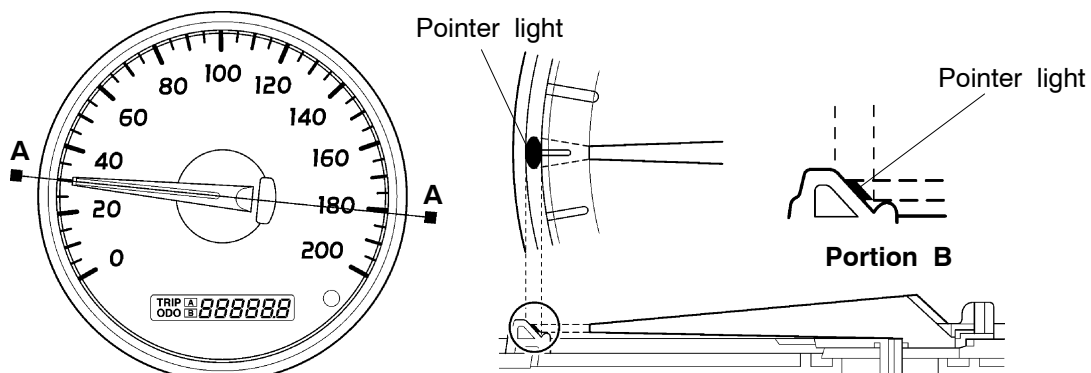

- The new model has large gauges for visibility.
- For the speedometer, tachometer, and gauges, the standard meter has a painted ring and the optitron meter has a chrome-plated ring.

Optitron Meter for Europe LHD A/T Models

233MO018

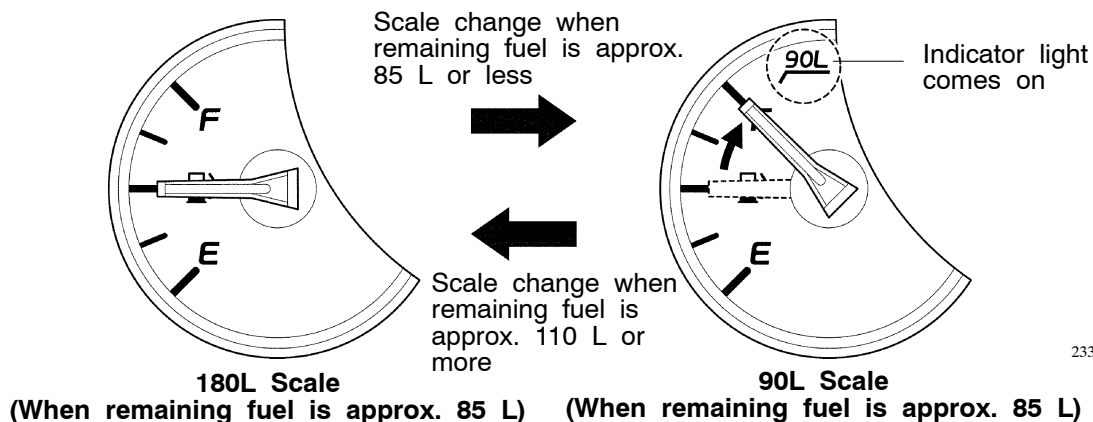

- The Optitron meter's speedometer and tachometer have pointer lights that light up in red from the tips of indicators to each chrome-plated ring.

A - A Cross Section

233MO019

- Models equipped with the dual tank system, in which there are two fuel tanks (main tank and sub tank) have a gauge system that automatically switches the fuel gauge according to the remaining amount of fuel (180 L scale gauge and 90 L scale gauge). (Option: 1KZ-TE for Australia, 5-Door for General Countries)
