

Moon Roof

- A tilt-and-slide type moon roof with jam protection function is available as an option. (Excluding 3RZ-FE engine models)
- The new model features a deflector with a speed-sensing adjustment function for reducing wind noise during high-speed driving.

Wiper & Washer System

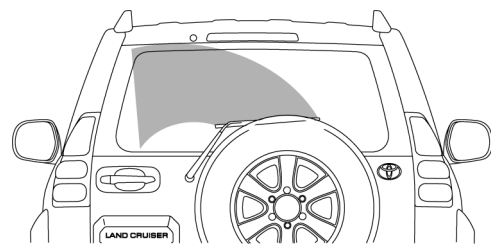

MO

- The surface of the wiper blade rubber is treated with a graphite coating to reduce the noise of impact during blade reverse operation and prolong the life of the blade rubber.
- Models for Europe have a blade with a fin on the driver's side to enhance wiping performance during high-speed driving.
- The front washer now has a spray-type washer nozzle built into the check valve.
- Dedicated rear wipers are available for either models with the spare tire mounted on the back door or models with the spare tire mounted under the floor.
