

Theft Deterrent System

A theft deterrent system is available as an option for all models.

Europe

- To deter the vehicle theft, the system is designed to sound an alarm if any of the doors, back door or hood is forcibly unlocked or opened, or the battery terminal is disconnected and then reconnected, the cable for the siren is cut, or somebody intrudes into the vehicle when it is locked.
- The alarm blows the horn and siren intermittently and flashes the turn signal lights and interior lights.
- The system has an ultrasonic intrusion sensor to detect intruders. The intrusion sensor can be turned off to prevent false alarms.

Australia, G.C.C. Countries, General Countries

- To deter vehicle theft, the system is designed to sound an alarm if any of the doors, back door or hood is forcibly unlocked or opened, or the battery terminal is disconnected and then reconnected when the vehicle is locked.
- The alarm blows the horn intermittently and flashes the headlights, taillights, turn signal lights and interior lights.
