

3. Brake

The size of the rear brake of the Europe 3-door wagon models has been changed as follows:

| Model | | New | | Previous |
|---------------|----------------------------------|-------------------------------------|----------------------------|----------|
| Rear Brake | Type | Ventilated Disc | | ← |
| | Caliper Type | FS13 | FS14* ¹ | ← |
| | Pad Area | cm ² (in. ²) | 37.0 (5.92) | ← |
| | Wheel Cylinder Diameter | mm (in.) | 45.4 (1.79) | ← |
| | Rotor Size (D × T)* ² | mm (in.) | 312 × 18 (12.28 × 0.71) | ← |

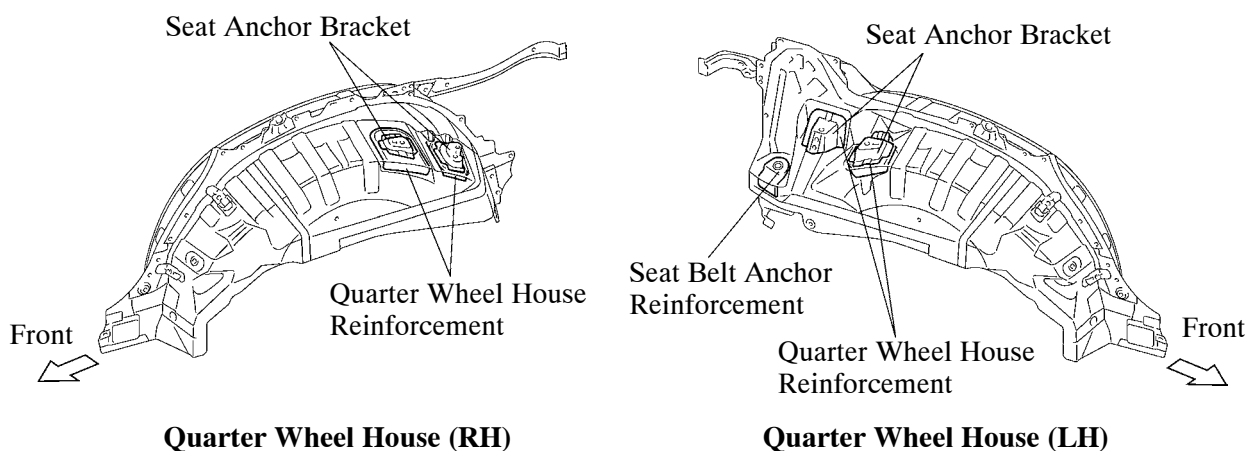

*¹: Only for Germany Models

*²: (Diameter × Thickness)

4. Body Structure

The specification without a rear No. 2 seat is available as an option for the GX grade of the Australia 1KD-FTV engine models. On this model, a quarter wheel house is provided as follows:

- Seat anchor brackets and seat belt anchor reinforcements for the rear No. 2 seat and quarter wheel house reinforcements have been discontinued.

- A seat belt anchor bracket and a seat belt anchor reinforcement for the rear No. 2 seat on the back door opening frame have been discontinued.
