

## NEW FEATURES

### ■ PARKING ASSIST MONITOR SYSTEM

#### 1. General

- A parking assist monitor system is provided as optional equipment for the Europe 5-door wagon models.
- This system has a television camera mounted on the back door to display the rearview of the vehicle on the display panel of the multi display. The display panel of the multi display also shows a composite view consisting of the rearview and parking guide lines to assist the driver in parking the vehicle by monitoring the rearview.
- When the ignition switch is ON and the back door is closed, if the driver moves the shift lever to reverse, the multi display switches to operate this system.
- The configuration of the parking assist monitor system is as shown in the diagram below.
