

LAND CRUISER/LAND CRUISER PRADO

OUTLINE OF NEW FEATURES

The following changes are made for the new Land Cruiser/Land Cruiser Prado.

1. Exterior

The following exterior colors are provided:

Color No.	Color Name	Note
056	White	Carryover
070	White Pearl Crystal Shine*	Carryover
1D4	Silver Metallic	Carryover
1E9	Dark Gray Mica Metallic	Carryover
202	Black	Carryover
3Q8	Dark Red Mica	Carryover
4R4	Beige Metallic	New
6Q7	Dark Green Mica	Carryover
8S6	Dark Blue Mica	New

*: Only wide body models for Australia and G.C.C. countries

2. 1GR-FE Engine

The DTCs (Diagnostic Trouble Codes) for the Australia models are the same as those for the Europe models, and the Australia models comply with EURO OBD regulations.

3. Air Conditioner

The cool box is no longer operates independently. Instead, the cool box operates in conjunction with the front air conditioner. For details on cool box operation, see the following.

Air Conditioner System	Operation
Auto air conditioner system	<ul style="list-style-type: none"> Turning the cool box switch ON also turns ON the front air conditioner system. However, turning the front air conditioner system ON does not turn ON the cool box. The front air conditioner system cannot be turned OFF when the cool box switch is ON. If the ignition switch is turned OFF when the cool box switch is ON, the front air conditioner system will also turn ON when the ignition switch is turned ON again. Turn the cool box switch OFF first to turn the front air conditioner system OFF.
Manual air conditioner system	<ul style="list-style-type: none"> The front air conditioner system must be turned ON before the refrigeration function can be turned ON*. Even if the cool box switch is turned ON, the refrigeration function will turn OFF when the front air conditioner system is turned OFF*.

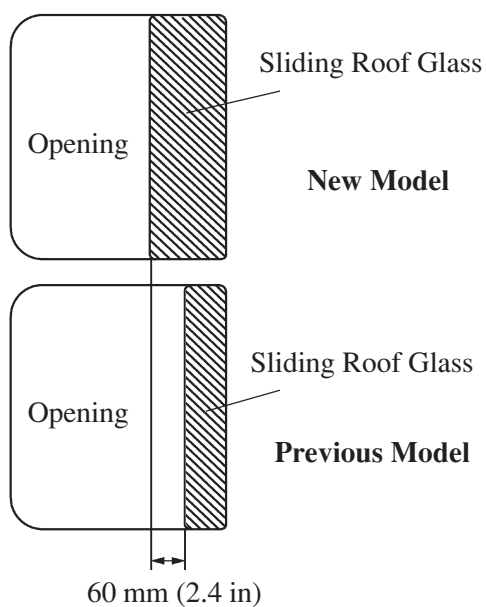

*: The air is blown into the cool box, but it is not the cold air.

4. Cruise Control System

The cruise control system has been provided as optional equipment on the 1KZ-TE, 1KD-FTV, and 1GR-FE engine models.

5. Sliding Roof

- The sliding roof is provided as optional equipment on all models except the 5-door model with the 2TR-FE engine for G.C.C. countries.
- The amount of sliding roof movement has been decreased by 60 mm (2.4 in.) over the previous model, making the width of the opening narrower when fully open.
